INTRODUCTION

The crossword puzzle hobby as an intellectually stimulating art form is a 20th-century American invention that has swept the nation and much of the modern world since the first one appeared December 21, 1913, in the old New York *World.*

The first book of crossword puzzles was put out eleven years later, April 10, 1924, by Margaret Farrar, America's first lady of crossword puzzles and crossword puzzle editor of the Los Angeles *Times* syndicate. During that same year the *World* began printing a puzzle a day. Now hardly a daily newspaper anywhere dares *not* to print a puzzle a day.

For example, my friend Walter Hicks, then publisher of a chain of several dozen southern California newspapers, told me, "For one edition we inadvertently omitted the crossword puzzle. The telephone switchboard almost exploded. We'll never do *that* again. I'd rather leave out the advertising. . . ." And when San Francisco's *Chronicle* and *Examiner* merged into a combined Sunday edition, it seemed logical to drop one of the Sunday puzzles. Logical, maybe, but it almost started a riot. Ever since, the combined Sunday *Chronicle* and *Examiner* has published *both* crossword puzzles to keep the readers happy—and quiet.

Crossword puzzle solving demonstrates resourcefulness in using words and also stimulates expanded general word knowledge. Use of dictionaries and standard references grew with the crossword puzzle explosion. And a new literary reference form called "crossword puzzle dictionary" came into being.

Regular dictionaries often have shortcomings as puzzle-solving aids. They flow from single *clue words* into detailed and multiple definitions and synonyms, or *answer words.* For optimum crossword puzzle use, however, dictionaries need also to flow from multiple *clue words* to single *answer words.*

> *Clue words* are those numbered "questions" printed with a crossword puzzle for which specific answers must be written in. *Answer words* are those answers.

Sometimes one elusive *answer word,* once discovered, will unblock an impasse and start a chain reaction permitting solution of the entire puzzle—or will clean up a major pocket that obstructs unraveling of the puzzle.

In checking thousands of printed puzzles, I have found that from 50 to 75 percent of the *clue words* comprise multiple-word terms such as "ship's deck," "Russian hut," "Iowa Indian," and "Peruvian fertility goddess." Multiple *clue words* seldom appear as such in regular dic-

tionaries and standard reference works. Hence the necessity for and resulting invention of the crossword puzzle dictionary.

Most crossword puzzle dictionaries existing as recently as the early 1960s were primitive, skimpy, and erratic. Hence was born my ambition to create the world's biggest, richest, and most complete crossword puzzle dictionary (in English or any other language). My Doubleday editors encouraged me to begin the compilation, which proceeded with the help of a small army of assistants. This unabridged word bank is the final result.

Here it is—a volume with more than 50,000 *clue words,* 150,000 *sub-clue words,* and 1,000,000 (one million) answer words. A wealth of geographic, historic, biblical, literary, foreign-language, archaic, obsolete, scientific, and musical words, and hundreds of other special references are marshaled here to make this volume a weapon that should "break" any crossword puzzle.

IS USING A DICTIONARY "CHEATING"?

Some diehards think so. But when one runs into an absolute block working a puzzle, there are only these alternatives:

1. Quit (the coward's cop-out).
2. Peek at the printed solution (*that's* cheating!).
3. Research (This dictionary is the maximum research tool ever assembled between two covers for crossword puzzle solution.)

Research is the ultimate recourse of the intelligent. Research enlightens the mind and satisfies the curiosity while it helps solve the puzzle. It is the only "puzzle solution insurance" that is *not* cheating.

WHERE DID THIS DICTIONARY COME FROM?

For more than ten years my associates and I assembled more than 150,000 index cards containing more than 1,500,000 words.

HOW TO USE THIS DICTIONARY

Read through this work before using it to become accustomed to the devices employed. The more often you employ it as a research bonanza, the more facile you will become in exploiting its resources.

1. *Clue words* are given in all caps, such as ACADEMY. *Answer words,* even in cases of proper names or initialed names (USA, USSR), are presented in lower case (annapolis, college, eton, institution, lycee, st cyr, usma, usna, west point).

Proper names (and initials) are treated this way because the primary use of this dictionary is for crossword puzzle solution. In crossword puzzles it makes no difference whether an answer word is capitalized or lower case.

2. In double or multiple *clue words* the primary *clue word* is capital-

ized and the secondary word or words—the sub-clue(s)—is/are italicized, such as ARMOR *leg,* HEARING *aid,* SALT *container.* When looking for a multiple *clue word,* if you do not find it the first way (we do not have LEG *armor*), look for it the other way (we do have ARMOR *leg*). (We also have under ARMOR the *sub-clue words body, horse, neck,* and many others.)

Another example: We do not have TERM *of endearment,* but you will find ENDEARMENT *term.*

3. Word alternatives. For *clue word* subtitles we often use *child* for son or daughter; *kin* for any relationship; *parent* for father or mother; *consort* for wife or mistress or girl friend.

Also, for example, if you don't find *cap,* look up *hat* or *headdress;* if you don't find *dross* or *waste,* look up *refuse;* if you don't find *garment,* look up *robe* or *dress* or *vestment.*

In other words, if you don't find the exact word given in your puzzle clue, look up other related words and you will usually find your answer.

4. Frequently, when the *clue word* has many examples or variations, you may not find the variations listed among the synonyms, but you will often find them under *breed* or *kind* in the secondary clues. Under HORSE and HOG you will find many names under *breed.* For various kinds of SAIL or TAX or TEA or ROSE, for instance, you will find long lists under *kind.*

5. Geographic multiple words (continents, countries, states, cities) usually start with the name of the place:

AFRICA *animal,* not ANIMAL *africa;* ALASKA *indian;* ENGLAND *actress;* HAWAII *fish;* OHIO *state flower.*

For vocabulary words from the language of the country, we have used the adjective form: FRENCH, ENGLISH, SCOTCH.

6. A capitalized word among the synonyms indicates that under that word are still other synonyms, some of which may not be given under the *clue word* you are reading. For example, under the clue SAGE you will find among the answer words SAGACIOUS. Under ENFEEBLE you will find ENERVATE.

Sometimes, instead of just a capitalized word, it is indicated in parentheses that you should look under another clue word for answers.

7. Any group of synonyms exceeding 75 in number is arranged by order of length of word, with 3-letter words alphabetized, then 4-letter words alphabetized, 5-letter words, and so on. (For example, see ABUSE.)

8. Cross-references and directions to other entries are supplied in many cases; these will direct you to alternative spellings, new names for countries, alternative names for people, and the like. For instance, under TESTAMENT you will find: "See also NEW *testament* and OLD *testament*"; these entries will give you additional answer words.

Other examples: "HINDU *writings,*" where you will find "See HINDU *scripture*"; VAN DIEMAN'S LAND, "See TASMANIA"; and TAGETES, "See MARIGOLD." These devices will help to guide

you to the answers you seek without needless repetition of hundreds of words.

9. Among secondary clues the abbreviation *comb.* indicates a combining form, where one or more syllables, usually from Greek or Latin and combined with other syllables, create a word related to the *clue word.* They are usually suffixes or prefixes as in HAIR *comb.* chaet(o), crini, pil(o), or TAWNY *comb.* fusco, or NAME *comb.* onym. These combining forms are often called for by crossword puzzle *clue words* and they are difficult or impossible to find in standard reference works and dictionaries. Far more of them are contained in this than in any other crossword puzzle dictionary.

10. Also among the secondary clues you will find *pert.,* which means "pertaining to." For example, under RABBIT *pert.* you will find leporine; SAIL *pert.* gives velic; and HADES *pert.* gives avernal, hellish, and stygian.

11. We have used *peak* as a secondary clue for individual mountains, e.g., Mt. McKinley or Mt. Whitney. We use *range* for a mountain range, e.g., Sierras, Rockies, Alps, Andes.

12. Vocabulary words of a foreign language are often in quotation marks under the country. But many are sprinkled throughout our regular lists of synonym-answer words.

13. The English language abounds with acceptable variations in spelling of the same word. The ideal (or lazy man's) dictionary would give each variation. To do so here would make a reference both physically and financially unwieldy. So in most instances we give one version only, thus giving the puzzle solver his clue but challenging him to use resiliency and imagination in working out the actual spelling called for by a given puzzle.

For example, for DEFECTIVE we give "meagre" but not "meager"; for PAYMENT we give "judgement" but not "judgment." In these particular instances we employ the British rather than the American usual version. But either is correct.

Often where the variation consists in dropping a letter, we enclose that letter in parentheses to indicate the variation: for example, "parol(e)," "wo(e)begone," and "earning(s)." Multiple-letter variations include "lament(ation)" and "appoint(ment)."

In this monumental pursuit and organization of information I was backed by a team of Pomona College students, teachers, and faculty wives headed by Mrs. Margaret Mulhauser, who with her late husband, Frederick, has been associated with that California institution of higher learning since 1941. Mrs. Mulhauser's personal contributions in research, compilation, editing, and proofreading of this work are of such dimensions as to make her in essence a coauthor.

The following sources, among many others, were combed for entries —most of them page by page and cover to cover—making this volume the most exhaustively researched crossword puzzle dictionary ever undertaken.

OTHER USES OF THIS DICTIONARY

A General Reference Word Bank

In addition to being the most comprehensive crossword puzzle dictionary ever created, this volume is a versatile mine of information for general reference use.

It is one of the largest books of synonyms ever published.

Under specific countries, there appears classified information on geography, cities, rivers, mountains, famous people, money, weights, measures, rulers, and many other subjects.

Under famous people—historical, mythological, and fictional—will be found friends, enemies, consorts, relations, and a wide and fascinating range of facts.

The dictionary is a voluminous source of information and precise nomenclature for many objects, vocations, people, countries, and other categories, with many breakdowns called for by crossword puzzles.

Brought together under ARMOR, for instance, are numerous different kinds of armor—for the *arm, elbow, face, head, hand, shoulder*—and for the *horse.*

ARROW entries, for example, include not only *kinds* but also the various *parts,* as well as names of *poisonous, spinning,* and *wobbling* ARROWS.

Hundreds of Indian tribes are given, under their precise geographic locations.

Trades have their special words: Under MASON you will find *gear* and *tools;* under CARPENTER are *joints, patterns,* and *tools.*

While this book is the crossword puzzle solver's best friend, it definitely offers invaluable help as a thesaurus of synonyms, both general and by categories. The dictionary is a teeming word bank for writers, editors, speakers, teachers, students, researchers, reporters, executives, and others who make their living with words, who use words as part of their daily work, or make a hobby of words.

Hobbyists—readers, travelers, history buffs, and others—will find this work an inexhaustible mother lode of supplemental information.

For the word-lover, here is a gourmet feast.

Bon appétit.
